

reduce. reuse. recycle...
compact the rest!

SOLAR POWERED WASTE MANAGEMENT SYSTEMS

Our unique SOLAR waste management approach is another example of how we at Bay Area Trash Compactor continue to act on our environmental values to enhance our customers' missions. Our compactors and balers have cleaned up many businesses, and saved thousands of dollars all while making terrific environmental sense.

P-4, P-6, P-200 Trash Compactor/Baler Combo

- Slash Garbage Costs 35%-75%
- Save Space
- Clean up Trash Area
- Reduce Garbage Truck Noise
- Eliminate Odors and Pests
- Save Labor

Our solar combination is the first of its kind to provide waste handling and recycling side-by-side with no wired electrical hook-up. Ideal for sustainability minded hotels, hospitals, universities, restaurants and shopping centers, this new combination is also perfect where bringing wired power to a location is cost prohibitive or simply too difficult. Now, a user can gain the benefits of a compactor and baler with the ability to place the system almost anywhere.

M42BC Baler

- Save Space
- Save Labor – no need to break down boxes
- Crush 150 boxes into easy-to-handle 175lb bale
- Improve Sustainability
- Simplify Recycling

Our SOLAR M42BC baler is ideal when you need a common sense answer to your daily cardboard waste problem. This portable baler takes very little space and can roll into place for simple installation. No need to break down boxes, the M42 baler will crush your boxes into a neat 150-175 lb. bale that you simply tie with the pre-threaded baling twine. Robust, simple and reliable. We have many systems that have been operating for over 20 years!

Self-contained or Stationary

- Slash Hauling Costs 35%-50%
- Save Space
- Clean up Trash Area
- Secure your Loading Dock
- Eliminate Odors and Pests
- Simplify Recycling

Our heavy duty SOLAR HYBRID trash compactors are second-to-none in quality workmanship and design. Available in sizes from 9 yards up to 45 yard capacity, our Compactors really take a licking. We have many NSC Self-contained compactors which have been operating over 20 years!
