

S-V2S

Vertical Compactor

Summit Equipment's S-V2S is a vertical compactor with a left or right-hand side eject bin that's designed to minimize space requirements. When real estate is expensive, a traditional horizontal compactor with its container may just take up too much space. The S-V2S footprint is only 4.5' X 7' so it fits where others won't.

The S-V2S container is equipped with side fork pockets for flexible waste company emptying. The container is supported so that the compaction force from the large vertical platen does not press on the casters, and it includes stiffeners in key positions to maintain its structural integrity. Best of all, since the container has no opening except at the top, you won't have unsightly and smelly leakage to clean up.

Ideal for small, compact spaces, the Summit S-V2S may be just what you need for economical disposal in small spaces. Three-cubic yard S-V3(S) is also available.

SPECIFICATIONS:

Motor	1.5 HP
Voltage	208, 240, 480, 575 V. 3Ø / 230 V.1Ø
Ram Force	26,861 pounds
Ram Face Pressure	19.14 PSI
System Pressure (Normal/Max)	1,600/1,900
Ram Penetration	12"
Clear Top Opening	24" X 57"
Loading Height	42"
Cycle Time	30 sec.
Hydraulic Pump	3.5 GPM
Hydraulic Fluid (15 gal.)	AW hydraulic fluid
Listed	UL508A & 73
Warranty	One Year Parts & Labor

Productivity

- Toss the trash, close the gate, push the button, and go!
- Load several bags at once for fast processing
- Platen teeth reduce volume by puncturing bags of waste
- Lockable controls are simplified to guarantee quick processing
- No time wasted cleaning up leaking liquid that's typical with traditional compactors
- No loss of compactor while traveling to landfill; hauler can empty it on-site
- 2-Cubic-yard container compacted by powerful hydraulic system will reduce emptyings per week

Durability

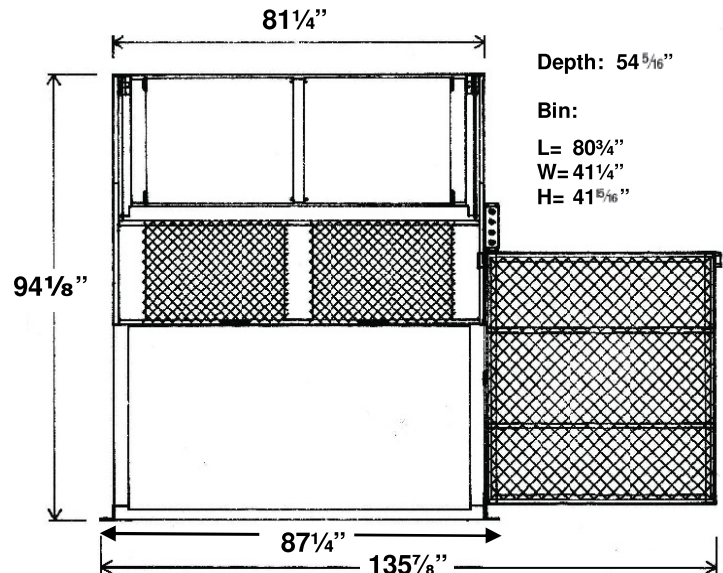

- Seam welded at all key joints to ensure structural integrity
- Container floor supported by structural beams to endure long-term compaction service
- Internal mechanics automatically lift container off the wheels during compaction protecting the wheels and your concrete
- Power unit protected from weather and vandalism in upper cabinet (*picture inset*)
- Built with industry-standard hydraulic and electrical parts for long life and serviceability

Flexibility

- 4½' X 7' footprint allows placement in tight spaces (94½" high)
- Container can be rolled out for emptying access, allowing flexibility in placement
- Controls right or left-hand side (*picture inset*)
- Empty with standard side-fork hauler trucks

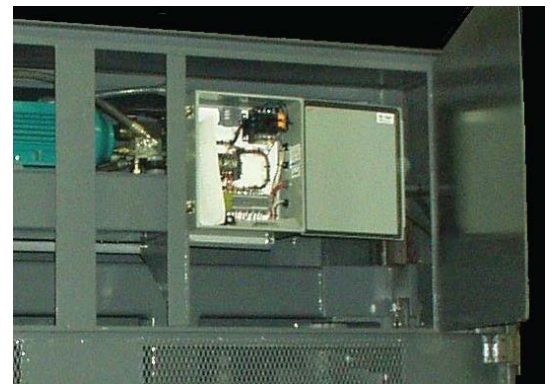

Options

- Right or left-hand Side Bin Eject (*picture inset*)
- Pressure gauge
- Reservoir Fluid-level Sight Gauge
- Pair of ¾" Drain Ports
- Fork Pockets for bottom of compaction cart
- Keypad mounted to Controls (*picture inset*)
- Custom Colors

Left or right-hand side bin eject for added versatility.

Power unit protected in the S-V2's space-saving upper cabinet.

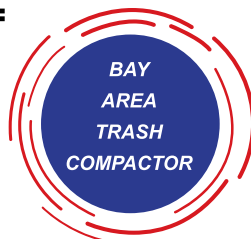

Simplified controls in a weatherproof enclosure with optional KEYPAD for added security.
