Engineered for Peak Performance

Summit Equipment's S-V2 is a stationary compactor designed to minimize space requirements. When real-estate is expensive, a traditional horizontal compactor with its container may just take up too much space. The S-V2 footprint is only 4' x 8' so it fits where others won't.

The S-V2 container is equipped with side fork pockets for flexible waste company emptying. The container is supported so that the compaction force from the large vertical platen does not press on the casters, and it includes stiffeners in key positions to maintain its structural integrity. Best of all, since the container has no opening except at the top, you won't have unsightly and smelly leakage to clean up.

At only 8 feet wide x 4 feet deep, the Summit Equipment S-V2 may be just what you need for economical disposal in a small space.

PRODUCTIVITY

- toss the trash, close the gate, push the button and go!
- load several bags at once for fast processing
- platen teeth reduce volume by puncturing bags of waste
- lockable controls are simplified to guarantee quick processing
- no time wasted cleaning up leaking liquid typical with traditional compactors
- no loss of compactor while traveling to landfill; hauler can empty it on-site
- 2-cubic-yard container compacted by powerful hydraulic system will reduce emptyings per week

DURABILITY

- seam welded at all key joints to ensure structural integrity
- container floor supported by structural beams to endure long-term compaction service
- internal mechanics automatically lift container off wheels during compaction; protects wheels and your paving
- power unit protected from weather and vandalism in upper cabinet
- listed to UL508A & 73 standards
- built with industry-standard hydraulic and electrical parts for long life and serviceability

FLEXIBILITY

- 4' × 8' footprint allows placement in tight spaces (100" high)
- 208, 240, 480 or 575 V. 3Ø or 230 V. 1Ø power
- container can be rolled out for emptying access, allowing flexibility in placement
- controls right or left
- empty with standard side-fork hauler trucks

OPTIONS

- custom colors to match site

▲ With a footprint barely 4' × 8', the S-V2 fits where others won't.

▲ Power unit protected in upper cabinet
