Recycling is smart. You can make it smarter.

Most of us are familiar with the evolving mandates for waste diversion. Making the need for innovative, flexible and customizable recycling programs more important than ever. To be truly successful, you need a solution that's ready to adapt to the needs of the environment and legislative changes. CleanRiver products give you full control to adapt your recycling streams without having to change your containers. That means you can keep your recycling program up to date without the risk of needing to buy new bins.

Protecting the environment. And your investment.

CleanRiver has been providing recycling solutions since 1990. We were around when recycling just meant having a blue bin beside your trash can. And while recycling is more complex today than at the turn of the century – your recycling program doesn't have to be.

At CleanRiver – we get it. We understand that today you might need a program to collect separate streams for waste, paper and bottles & cans. Yet next year you might be mandated to add composting to your program. Or perhaps you'll be

able to reduce streams because of new sorting facilities in your municipality. But that doesn't mean you have to wait for change to be cutting edge.

CleanRiver is also committed to helping you understand that recyclables are more than just a means to divert waste from landfill. They are also an asset that can help drive funding for your sustainability initiatives. And we'd love to help you uncover those savings to help realize a tangible return on your recycling program investment.

FLEXIBLE SOLUTIONS

Flexible

Change is constant - the ability to add, remove or right-size your containers is critical to any recycling program's success. Waste receptacles seriously outnumber recycling stations in most facilities.

As a result, material that could be recycled or composted ends up in landfill and potentially valuable recycling commodities are lost. Transition® recycling bins do just that and are so flexible that you'll never have to buy a regular trash can again.

Transition[®] TPM

This multi-purpose recycling station has the ability to change the number and volume of streams collected. With its compact footprint, high-impact stream labels and entry level price point, this container is an essential component in your recycling program.

Ideal for: Washrooms, Back-of-House applications, Parking Garages, Hallways, Classrooms.

Available in 8 standard colors:

Unique

Sometimes your recycling needs are as unique as the business you are in. CleanRiver is your partner in the design and manufacture of customized solutions that help you recycle in ways others can't.

Give us a call and we'll listen to what you're looking for and come back to you with a solution that's exclusively yours.

Blackberry

Blackberry was throwing away gloves by the handful. So CleanRiver designed a bin just for gloves so they are collected, washed and reused, resulting in less cost to replace gloves as well as reduced landfill fees.

Little Rock Zoo

Little Rock Zoo was wasting money on reprinting maps. So CleanRiver added a unique graphic to their existing bins so maps can be reused by future visitors.

Pret a Manger

Pret a Manger needed to collect four streams in a small space. So CleanRiver designed a completely unique unit to address their footprint and capacity needs while fitting in with their décor.

Zero waste is within our reach.

Most of the waste we generate is recyclable. The thing is, not everyone recycles. CleanRiver's recycling programs are designed to help everyone learn to reduce the amount of trash they generate to fill a five inch Mini Bin every week – making the concept of a world without waste a reality we can achieve together.

Contact CleanRiver at 888-646-4246 today to start your journey towards zero waste with the Mini Bin!

The shift from 3Rs to 3Cs.

Recycling used to only be about **REDUCE, REUSE** and **RECYCLE**. Today it's also about **CULTURE, COMMUNICATION** and **COLLECTION**. To drive a successful recycling program, you must ensure that everyone knows about it and the right collection streams are in place so that it can be embraced.

Call CleanRiver today at 888-646-4246 so we can take the first steps together to help you build a recycling program that works and is rewarding to your business and people.
