

VERSA-PAC COMPACTOR

MODEL KPV

Crushing Time

Time is money. In the waste-hauling business, that is truer than ever. Every minute counts out on the route. Luckily for you, you can count on the **K-PAC VersaPac**.

The **VersaPac** is a new breed of compactor that works with seamlessly with front-load, rear-load and roll-off systems. Systems that can be accommodating to sites of any size. This means, when your customer's needs changes, the container can too, but the **VersaPac** system won't.

To save more time (and money), the **VersaPac** is smart too, smart with industry leading features!

Features Include:

- **Automatic Latch and Signal Light Systems** notifies drivers when the container is locked in place. Front-load drivers, never leave their driver's seat!
- **Retainer Teeth** keeps trash inside and prevents spillage of the container when during the separation of the compactor.
- **Heavy Duty Vinyl Cover** prevents spills during loading and transporting the roll-off container.
- **Hydraulic Unlatch-and-Lift System** opens rear door so roll-off drivers can dump a load without getting out of their truck.
- **Quick Adjust Door Seals** make it simple to keep the roll-off container liquid tight.
- **Quick Latch System** locks all three types of containers firmly in place and securely under the compactor. No more "walk outs".
- **Full Light/Alarm (Optional)** indicates user when the container is full.

So, if you're ready to start saving work and expense, reducing inventory and operating smarter, then it's time to try the **K-PAC VersaPac**.
