

Summit Victor Controls / Operation

“AUTO” Position allows ram to compact down and return to the top
“HOLD” (HOLD for Pick-up) Position allows ram to compact and return to level position, turning machine off, while illuminating Green “Pick-up Ready” light visible to the garbage truck driver and allowing easy removal of the bin.

“AUTO”

1. Open door noting that ram is up and place trash in chamber
2. Close gate and push GREEN Start button
3. Ram will go down and return to top, ready for more trash.
4. As unit approaches full the GREEN light will flash slow, then faster. When the GREEN button illuminates and stays lit the compactor is **FULL**.
5. Key Switch to **HOLD** Mode and Cycle 1 more time – readying unit for pick-up

“HOLD”

1. **“HOLD” (HOLD for Pick-up)** Position allows ram to compact and return to level position, turning machine off, while illuminating Green “Pick-up Ready” light visible to the garbage truck driver and allowing easily removal of the bin.
2. To load more waste, place KEY switch in **AUTO** and push **GREEN** Start. Ram will return to top with gate closed.

“MANUAL”

1. To operate ram manually push in **RED STOP** button, hold bottom **TOGGLE SWITCH** to **UP/Down**.
2. Place Into **HOLD** mode and cycle compactor to ready unit for pick-up
